

## Finding the Right Talent for Your Needs

Hiring the right people is difficult. Skills, experience, and culture-fit all play a role. The right hires can make or break your projects. But long searches can take up valuable time and create delays.

### Direct Hire

You can take the time required to find the perfect fit and can afford a candidate with all the right skills and experience. Our Direct Hire process will work for you. We will use our extensive network to find candidates who meet your requirements.

### Contract-to-Hire

You don't have time for a protracted search but you don't want to hire someone who does not have the capabilities your team needs. A Contract-to-Hire arrangement is the answer. We assess your needs, hire the right candidate for the role, and assign them to work for your company on a contract basis. If at the end of the contract you are happy with our candidate, you can hire them.

### Residency

High demand for technical talent can mean that searches are long and ideal candidates can be expensive to hire. Our Residency program can help. Like a medical residency, our program pairs a seasoned expert with new talent to provide the skills and experience you need. At the end of the program, the candidate will have the required skills and experience to fill the role independently.

Quansight Staffing works with you to quickly find the right people for your roles requiring Python, data-science, data-engineering, machine learning, automation, or engineering management skills.
