**NEW ACTIVITIES ADDED IN 2023**

**Sunday Open Space**
(16 submissions, 3 talks)
- Sharing "advent of code" puzzles solutions - Argentina
- Story of... My Email - Australia
- Tracking UFOs with Python, Flask, and MongoDB - USA

**My PyCon Experience**
- 10 submissions

**Python Quiz**
- Friday - 15 submissions
- Saturday - 15 submissions
JAMES GERITY

This is my third PyCon US, I have attended virtually since 2020. In addition to experiencing the shared sense of community that permeates PyCon, I've learned some great things about recent and future changes to CPython, and some great examples of what Pythonistas are doing with the language out there in the Real World.

MICK ZELLER

This is my 2nd in-person PyCon. My first was 2019, when I saw an unexpected call for theatrical plays to apply to be part of The Art of PyCon hatchery event lead by Sumana Harihareswara. I applied, was accepted, and performed an original short play (among many others) - the script can be found here: https://kylerconway.com/2020/03/16/hello-world-2/ My second in-person PyCon is this year, and I'm once again returning for another play (though in a different role), I was fortunate to be able to work as director/collaborator on "Argument Clinic: What Healthy Professional Conflict Looks Like" with Sumana Harihareswara and Jacob Kaplan-Moss. They’ve written a companion piece here (below) and I’m told some behind the scenes are forthcoming. At any rate, I appreciate the kind and caring community I’ve found here at PyCon in particular but though python more generally. Thank you for providing a space that is broadly inclusive. https://jacobian.org/argument-clinic/

KYLE CONWAY

First-time PyCon attendee! I loved the exciting vibe and social aspect the conference encouraged. I met a handful of amazing people outside my daily bubble. I left feeling motivated and excited to share my experience with my team. 10/10 recommend PyCon and hope to get the chance to go next year! #pycon2023

I'm so happy to attend my first PyCon! I feel uplifted by the positive energy from the community and inspired by the amazing diversity of speakers and talks. I love the unique mix of technical, inspirational, community, and creative coding talks at both the formal talks and the community lightning talks. While volunteering on the Online Experience Committee, I have had a lot of fun meeting so many amazing people. I hope to attend in person and volunteer at a future PyCon.

This is my first time attending PyCon, largely due to residing in Australia. I'm here thanks to the marvellous efforts of so many people, making the livestream possible. Hugely excited for what's coming!

I first attended in 2021. I really enjoyed the tutorial and all the awe-inspiring talks. Volunteering with ee and meeting fellow Python friends here. So grateful for all of you!

Primera vez participando en la PyConUS como voluntario remoto. Como hispanohablante estoy muy contento de que exista algo como las Pycon Charlas. Gracias a toda la gente que hace posible estos eventos: organizadores, speakers, sponsors y participantes! Ansioso por asistir presencialmente a una PyCon en el futuro :)

This is my first PyCon, and what's more I'm here running the booth at a brand new job (in tandem with a coworker I met for the first time this week) so I expected it to be trial by fire. To my very pleasant surprise, the booth experience has been seamless and this is the most welcoming, kind and warm community I've encountered in tech for a long time. I have been able to strike up conversations with complete strangers and it's such a joyful experience to encounter so many ideas and concepts. While also feeling like everyone here really wants newcomers to "get it". As first impressions go, this event is really great.

JOCELYN MATTHEWS

My second year attending online and liking it. Still, can't wait to finally attend the conference in person.

WILBER HERNANDEZ

This is my first PyCon, and I'm attending online courtesy of a Community Service Award. I'd never considered it practical or even possible for me to get to PyCon, so a big thank-you to those who pushed me to go for it! It's great to hang out - even virtually - with people that I primarily know as names on emails and pull requests.

CHRIS ANGELICO
